English: Professional

Yoruba: Native

PROFESSIONAL SUMMARY

Junior Frontend Developer who builds fast, responsive, SEO-friendly websites for small businesses in Nigeria using vanilla HTML, CSS and JavaScript. I turn business ideas into accessible, mobile-first interfaces that load quickly on low-bandwidth connections.

Creator of the live WHYZEE Nigeria Limited website, a 6-page B2B medical supplier platform. Based in Suleja and open to junior roles and freelance work, including remote.

PROJECT EXPERIENCE

WHYZEE Nigeria Limited – Medical Lab Equipment Supplier

2024 | Live project | HTML5, CSS3, Vanilla JS | Role: Frontend Developer

- Built a complete 6-page responsive B2B website serving hospitals and research labs across Nigeria
- Implemented a product catalog with category filtering and a quote request system
- Delivered fully mobile-responsive pages with fast load times and SEO-optimized markup
- Applied a trusted blue palette (#0a4da6) to convey medical professionalism
- Deployed the site and documented the code on GitHub for smooth client handover

ClearHealth-NG – Healthcare Platform

2026 | HTML, CSS, JavaScript

- Designed a clean, trust-building and accessible healthcare interface for the Nigerian market
- Built services pages, appointment booking and responsive navigation
- Optimized for low-bandwidth users and overall performance

9ja-Logistics – Logistics Platform

2026 | HTML, CSS, JavaScript | Deployed on Vercel

- Created a mobile-first booking and tracking interface for SME deliveries
- Built services pages, a shipment tracking form and a pricing table
- Resolved a deployment issue by removing a duplicate index file

PayCalculator-Nigeria – Fintech Tool

2026 | Vanilla JavaScript

- Developed a salary calculator covering PAYE, deductions and net pay for Nigerian payroll
- Delivered a clean interface for employees and SMEs with local tax logic

Task-Flow – Productivity App

2026 | JavaScript DOM, localStorage

- Built a task manager with create, read, update, delete (CRUD), filtering and localStorage persistence
- Implemented client-side state management with a responsive, clean codebase

AI Safety & LLM Evaluation – Research

2026 | Research framework

- Researched AI safety and LLM evaluation methods, building analytical depth beyond frontend work

EDUCATION & LEARNING

Self-Directed Frontend Engineering

2023 – Present | Building in public | Focus: business websites

- Continuous learning in accessibility, performance and SEO
- Prioritising real-world projects over tutorials
- Goal: junior frontend role and freelance work for SMEs in Nigeria
